***Mr. Tom Wanner
Cleveland Plumbing Industry
981 Keynote Circle, Suite 30
Cleveland, OH 44131-1842***

Dear Tom,

Thank you and Jim Roddy for your presentation of the state of the plumbing code in our State of Ohio. It was enlightening to hear the progression of the history of the code over that last 40 or so years.

The Board of Directors of the Northern Ohio Chapter of the American Society of Sanitary Engineering wholeheartedly support the Cleveland Plumbing Industry in their pursuit of petitioning the Board of Building Standards to adopt an Ohioized version of the Uniform Plumbing Code. We feel that it is in the best interests of the entire plumbing industry and more importantly our customers and clients to have a code that is more adaptable and governed by a consensus of the plumbing industry. Under the consensus process, the UPC can not be controlled by any one segment of the industry. The entire industry has a voice in the code process.

Please feel free to contact us if there is anything further that we can do to help this cause.

Sincerely,

***The Board of Directors
Northern Ohio Chapter
American Society of Sanitary Engineering***
